

IPv6 in the Pacific

Dave Phelan

Senior Network Analyst/Technical Trainer

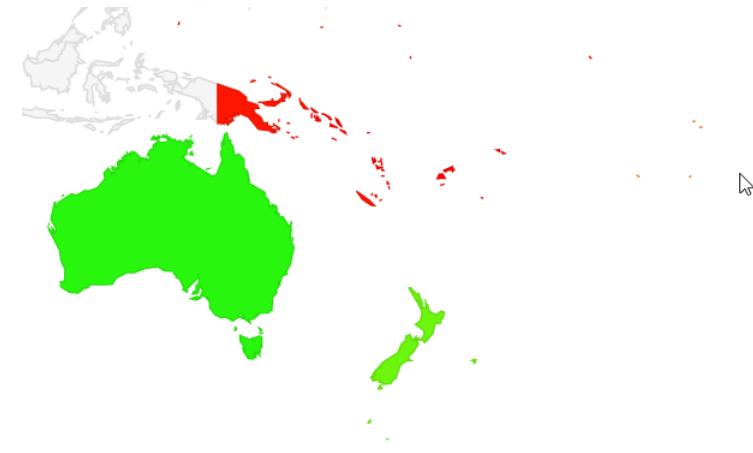

The Region

- Oceania
 - 24 separate economies
 - Aside from AU/NZ
 - Most have relatively small population
 - Geographically dispersed
 - Limited access to good international backhaul connectivity
 - Limited competition within the markets

Statistics

Statistics IPv6 – Oceania

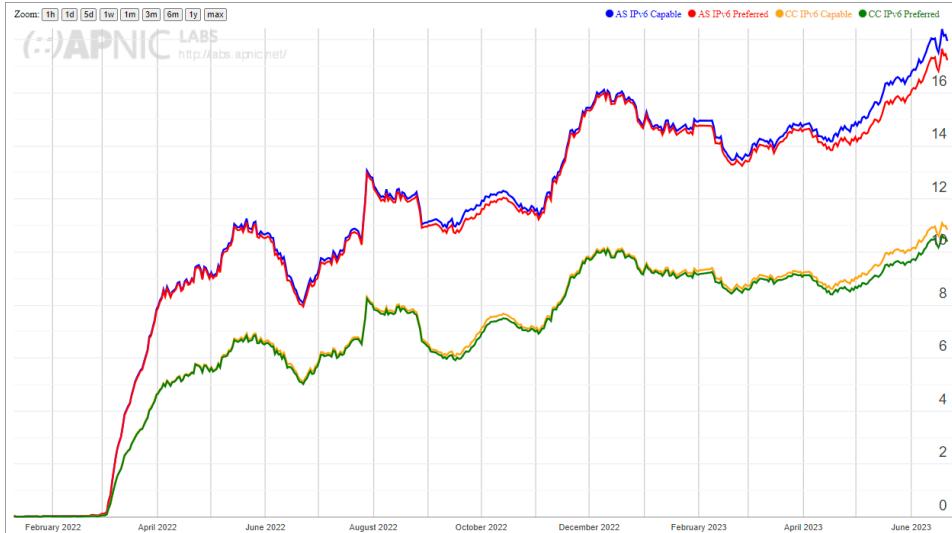

- Sub-region - ~33.95% IPv6 Capable
 - AU/NZ are lifting the score
 - AU – 39.06%
 - NZ – 28.51%
 - PF – 10.84%
 - The rest of the region is ~15% Combined

When IPv6 Goes...wrong

Provider in NZ that has a Large IPv6 Deployment.

Something wasn't (and still isn't) right!

Challenges

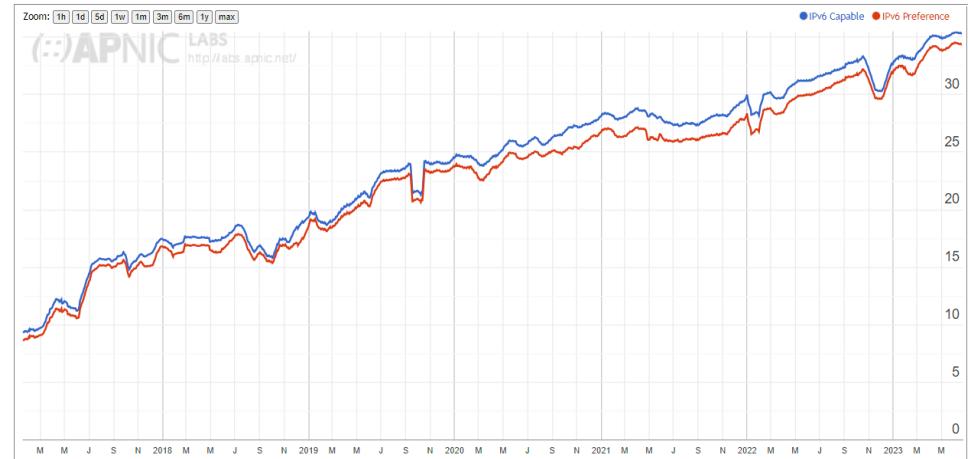

IPv6 Challenges

- End user acceptance
 - Residential and Mobile
 - Business and Enterprise
- Networks not ready
 - Older equipment
 - Software (Billing/LOB)
 - Additional Licencing cost(especially Mobile)
- People
 - Staff are not adequately trained
 - Current Tertiary/Industry training rarely addresses IPv6(Pun Intended)
 - Misconception on use
 - Lack of ability to adequately address plan
 - Management not willing make changes

Why Deploy IPv6?

IPv6 Deployment

- Cost
 - IPv4 Address space ~US\$40-50 Per IP
 - US\$12,800 /24
 - Hardware
 - CGNAT is not free
- The world is changing
 - 3 x increase/5 years
 - Hyperscalers are catching up
 - CDN Providers are ready for your IPv6 Packets
 - IPv6 is now the higher preferred Protocol in the USA

IPv6 Deployment

- Stop saying “I’ll do it tomorrow”
 - We have been saying that for 25 years
- Networks are not going to get simpler
- Grants Are available
 - <https://isif.asia/infrastructure-ipv6/>
 - US\$30-250K
 - Open to all Industry types
